of A.M.S.

Gold must surely be the prevailing hue of Tricolour. Here you find preserved records of golden days, of days filled with great thoughts, great causes, great works, great heroes, great loves, great joys, great sorrows, great satisfactions and great disappointments, and yet always of great fun. Men and women, ideas, emotions, experiences and events have in these years been on a heroic scale. Your mind and spirit have been free as never before in your life and as perhaps never again. Will you ever again be as confident that, like Archimedes, given a good fulcrum and an adequate lever you can lift the world? Will you ever again have as much fun? All these experiences have in some measure been captured and displayed in this book. Hang on to them. Don't let them escape. They will lift up your heart many times, when it is burdened with the cares of the day. Perhaps they will help you to live on a heroic scale, even to be a hero yourself. God knows, we need heroes.

Stuart Ryan.

PHILLIP HELWIG
B. Sc.

Mr. Helwig is presently working on his M.Sc in Civil Engineering. In his past year and a half at Queen's he has devoted much of his time to CUSO and foreign students. He was president of CUSO in 1964-65 and re-elected in 1965-66. He started CUSO activity on campus by initiating meetings and the foreign student program. During this time, he raised the number of CUSO volunteers from two to twelve and organized an orientation program for all CUSO delegates. Mr. Helwig was the delegate to two national conventions and for the period 1966-67, was elected to the National Policy Committee. He has been working actively for CUSO for two years in India and Ceylon.

What price education?

It is beyond price! Education cannot be bought, borrowed, or inherited. The only way to obtain it, is to earn it. Stelco recognizes its value, and the increasing need for it, in today's highly-competitive atmosphere . . . and also recognizes that specialized education is denied to many deserving young Canadians through lack of funds. This is why Stelco sponsors a program of assistance to universities, technical schools, and students across Canada, by providing awards, scholarships and bursaries in Technology, Engineering, Science, Business Administration, Teaching, Commerce, and Finance.

For further information on this program, or on a career in steel, write to Stelco's Head office in Hamilton, Ontario.

THE CANADIAN ARMED FORCES

Congratulations to the Class of '66

For more than fifty years the graduating class at Queen's has contained officers of the Canadian Armed Forces, regular and reserve, who have qualified for a commission while a member of Queen's University. Currently there are several programmes in which a university student may qualify for a commission.

The Regular Officer Training Plan

Tuition and other expenses are paid, plus pay and allowances for 365 days per year. Members are commissioned in the Regular Force on graduation, then serve a minimum of four years in the component of their choice.

The Medical Subsidization Program

Tuition and other expenses are paid, plus pay and allowances for 365 days per year. There is no military training during the academic term. Members serve a minimum of three years after graduation.

The University Reserve Training Program

Members are paid for the actual time spent in training. After completion of the second year the officer cadets are eligible for a commission in the Reserve with the rank of second lieutenant or equivalent.

Direct Entry

Undergraduates may apply for a commission in the Regular Force at any time. Students in the final year may apply for a commission upon graduation.

Eligibility:

Canadian citizens and British subjects who are landed immigrants may earn a commission while attending university.

Training:

Military training during the term is about two hours each week. Summer training is a minimum period of 12 weeks, but may be extended to 15 weeks.

Another outstanding building for Queen's University

The visitor to Queen's University cannot fail to be impressed by the fine buildings on the campus. Many of these are built with Canada's own building stone — Queenston Limestone.

Distinguishing features of this latest addition are clean, simple lines and ruggedness. Rock-faced areas were completely fabricated prior to shipment to the site, eliminating on the site cutting.

We congratulate all concerned on the very pleasing results of their work.

Here's why **ONTARIO** builds with **CONCRETE** made with **"CANADA" CEMENT**

No other building material is so versatile, so durable, so economical both in first cost and in maintenance. Without concrete, modern highways would not stand up to weathering and the heavy traffic of today — buildings, towers and bridges could not be given the aesthetic appearance they deserve.

Here are but a few of the many projects in Ontario which concrete made possible. For full details on these and other structures and for free technical assistance and literature, please contact the Canada Cement Company Sales Office nearest to you.

Lest Tricolor '66 slip by without a single picture of Grant Hall. To the staff and all those who made Tricolor '66 possible, I shall be forever indebted.

Special thanks are due to Wally Berry and staff for their usual and infinite co-operation and to Rosemary Leese without whom the book might never have appeared.
